Sicherheitsrisiken identifizieren

	<i>Allgemeine Theorien</i>	<i>Nach Ende des kalten Kriegs</i>
<i>Ethische Frustrationen</i>	4. Nationalismus als Makro-Prozess	1. „Ethnische Welle“
<i>Materialistisch/ Logistisch</i>	3. Polit- Ökonomischer Individualismus	2. „Neue Kriege“

Gliederung

- Wissenschaftliche Debatte
- Horizontale Ungleichheiten
- Kausalmechanismen
- Aktuelle Forschungsergebnisse
 - Politische Ungleichheit
 - Ökonomische Ungleichheit

Politökonomische Literatur

- Ungleichheit irrelevant!
- Eher “greed” als “grievance”

“So what causes civil war? Rebel movements themselves justify their actions in terms of a catalogue of grievances: repression, exploitation, exclusion. Politically motivated academics have piled in with their own hobbyhorses, which usually cast rebels as heroes. I have come to distrust this discourse of grievances as self-serving. ”

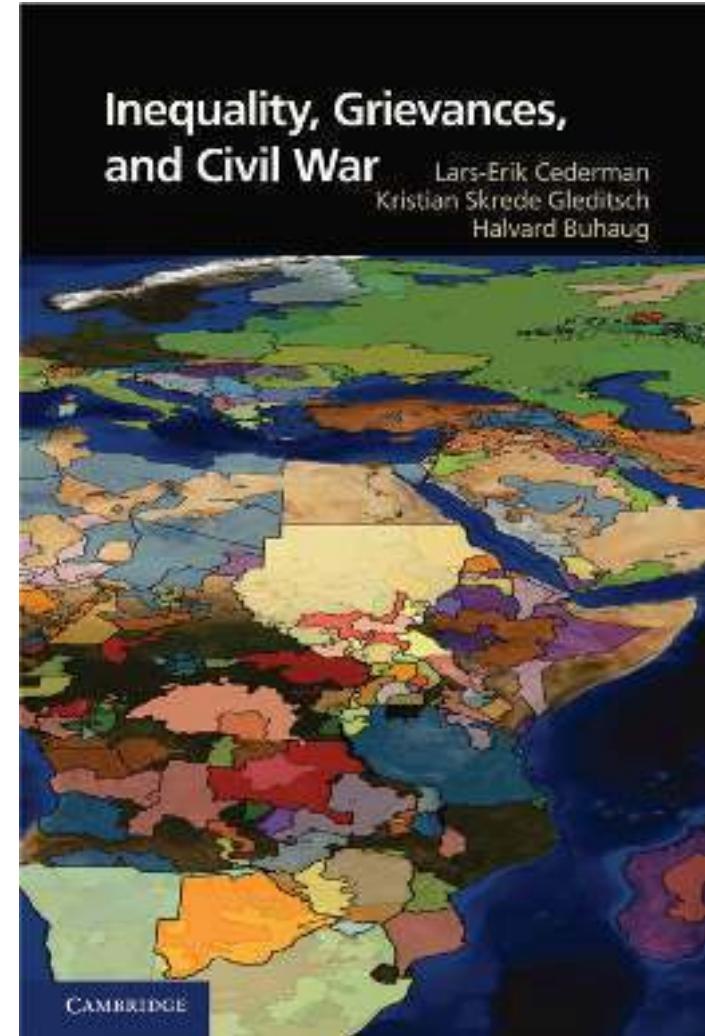

Prof. Paul Collier, Oxford Univ.

Bottom Billion, OUP 2007

Kritik und Gegenkritik

- Kritik an „Grievance“-Theorien:
 - Omnipräsenz der Missstände
 - Irrelevanz der Missstände
- Kritik der Kritik
 - Individualismus
 - Opportunitätstheorie
 - Abwesenheit des Staates

Nationalismus und horizontale Ungleicheit

- Der Nationalismus
 - „ist ein politisches Prinzip, das aussagt, dass die politische und nationale Einheiten kongruent sein sollen.“
- Horizontal inequalities:
 - “inequalities in economic, social or political dimensions or cultural status between culturally distinct groups”

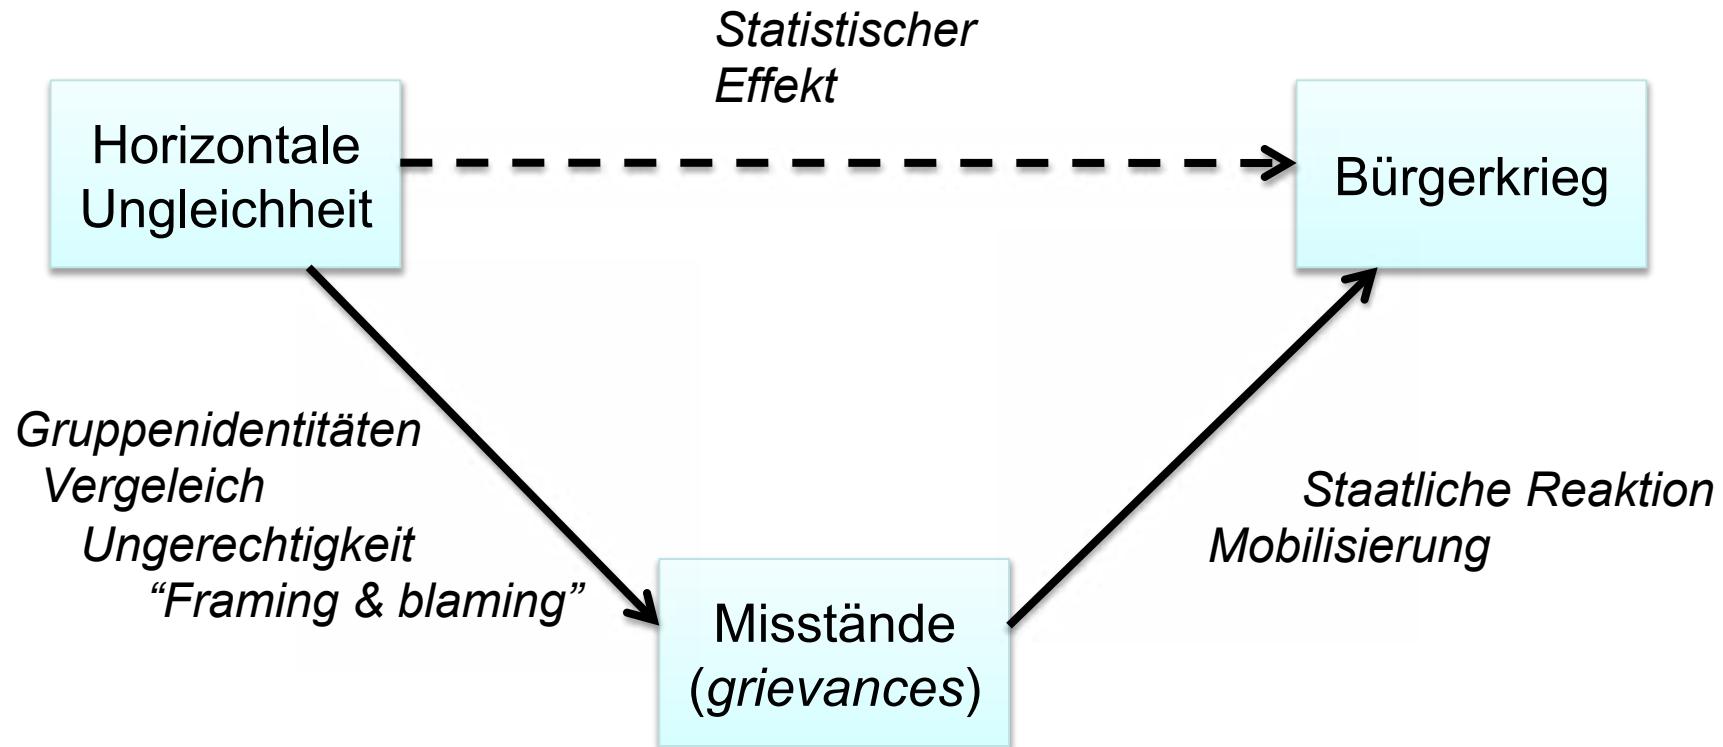

Ernest Gellner

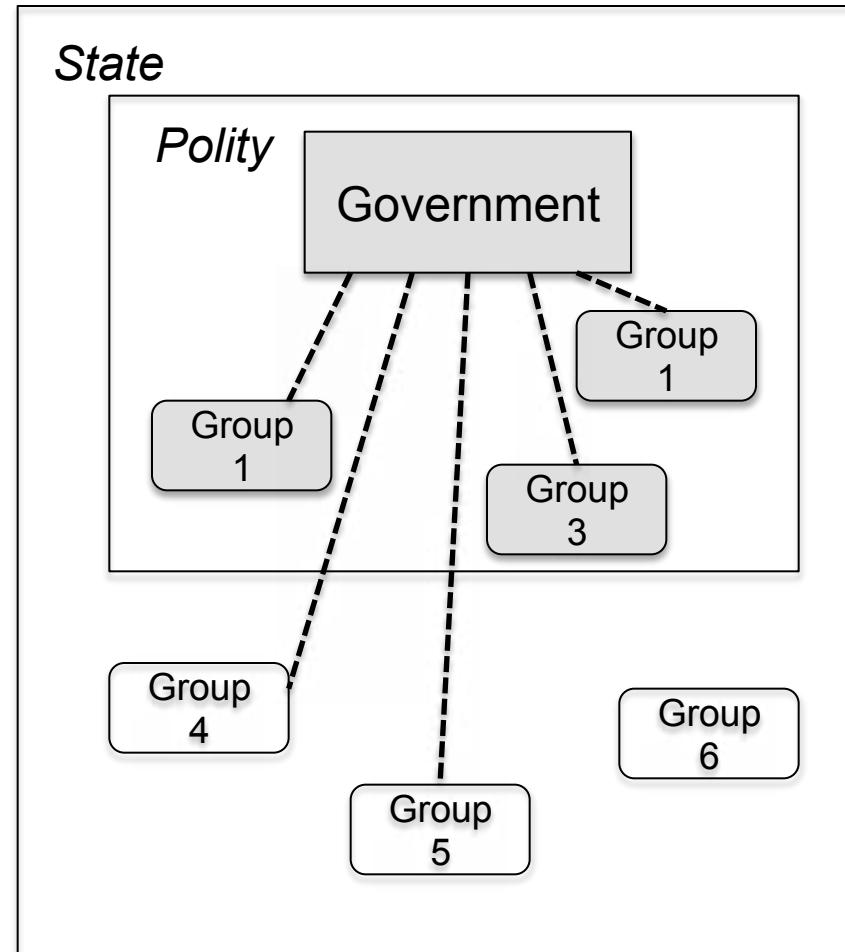

Frances Stewart, Oxford Univ.

Von horizontaler Ungleichheit zum Bürgerkrieg

Das Polity-Modell

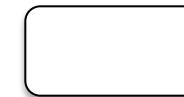

Legend:

Included group

Excluded group

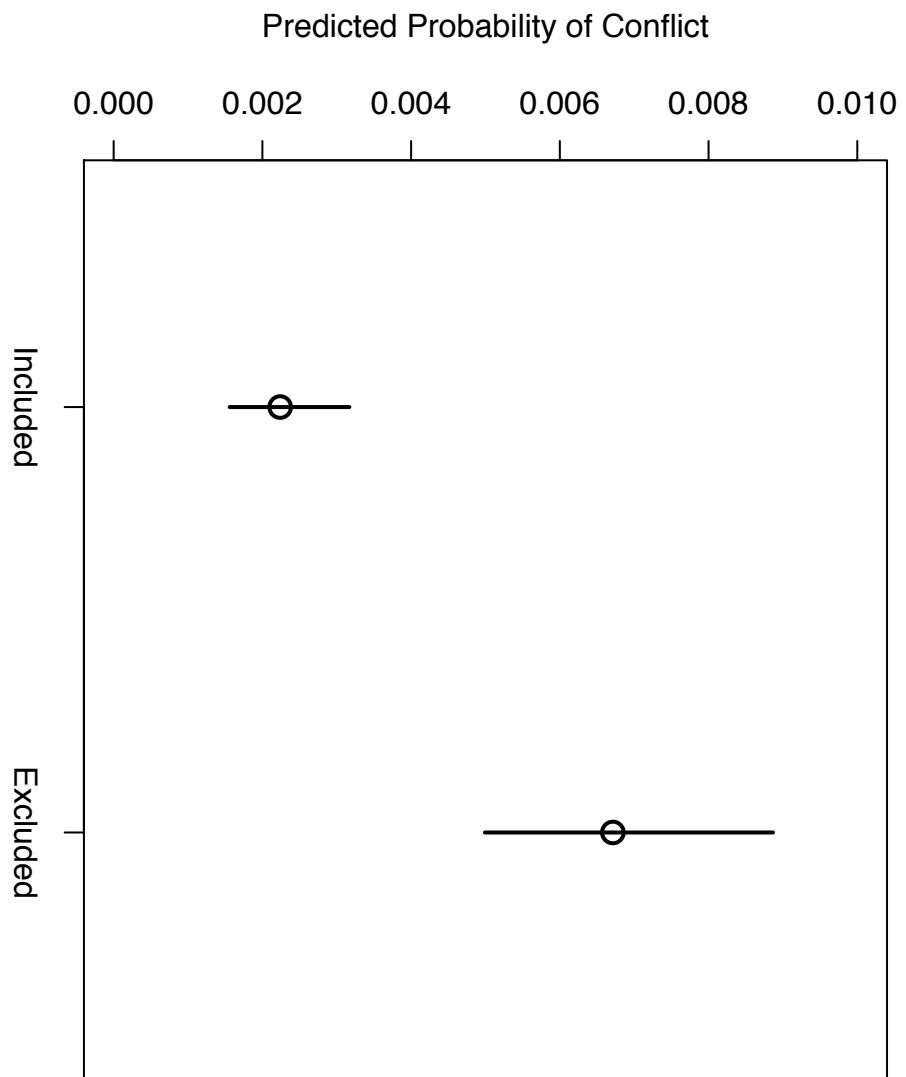

Political relationship

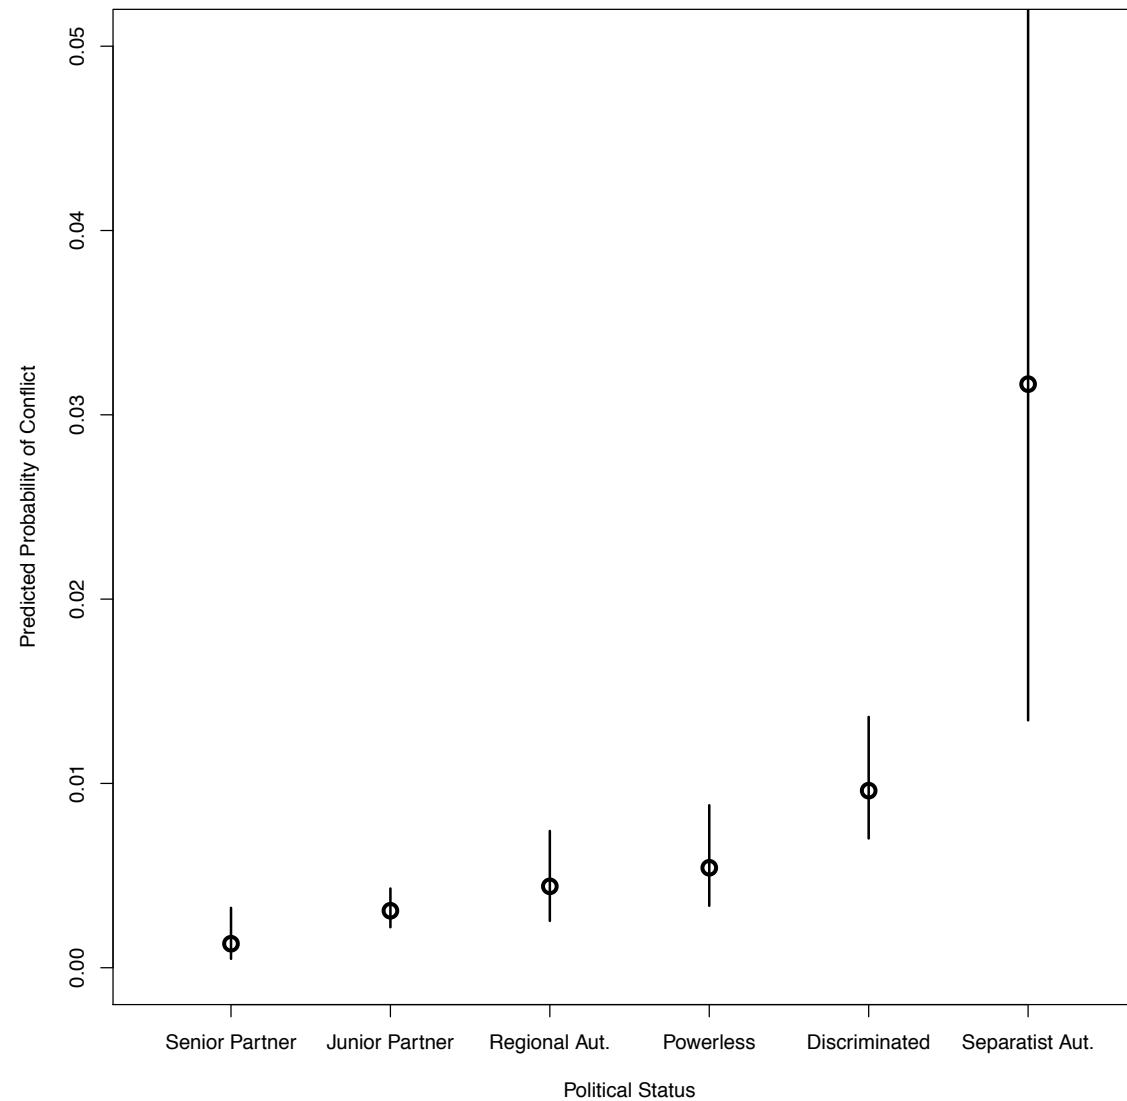

Ethnic Power Relations

	Group Years	Onsets
<i>Included groups:</i>		
Monopoly	1,846	0
Dominance	2,105	0
Senior Partner	3,074	7 (0.23%)
Junior Partner	5,877	22 (0.37%)
<i>Excluded groups:</i>		
Regional Autonomy	5,320	25 (0.47%)
Powerless	9,735	63 (0.64%)
Discriminated	5,038	63 (1.24%)
Separatist Autonomy	489	27 (5.23%)
Total	33,484	207 (0.61%)

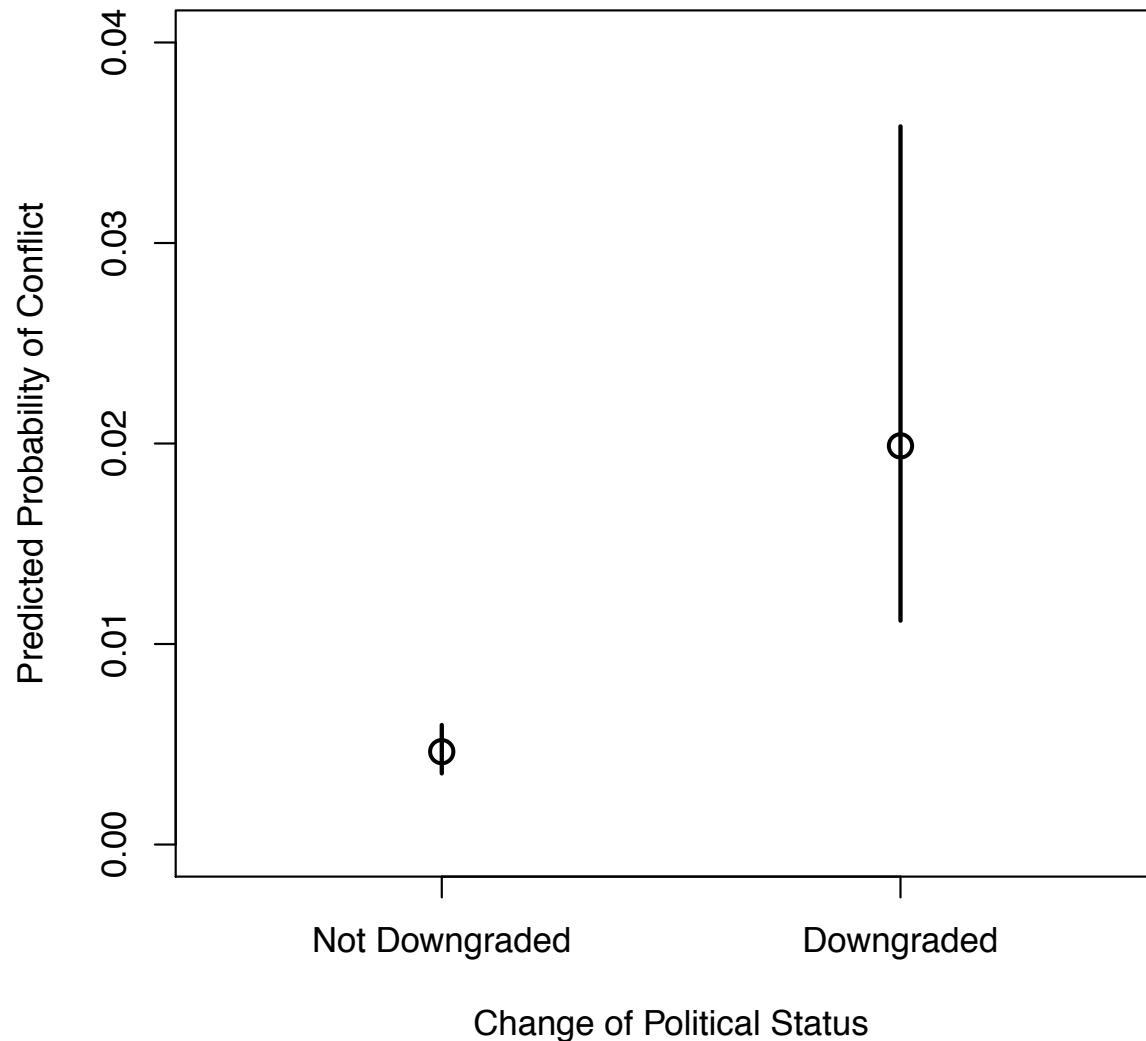

Effekt von Exklusion
