February 12, 2019

This seminar covers the literature on political violence in the contemporary world. We will study the determinants, processes, and outcomes of civil war and other forms of conflict. Specific topics include ethnic violence, the role of natural resources and other economic factors, the intricate relationship between state building and violence, as well as various combat and pacification strategies. In the weekly sessions, we discuss the state-of-the-art of the literature and identify theoretical, empirical, and methodological gaps that may inspire your own research. Over the course of the seminar, each student develops a research design presenting a convincing and feasible strategy to address an open research question. The design serves as the basis for the final term paper and, potentially, a MA thesis.

Requirements and Grading:

Students will have to fulfill the following requirements:

- Actively participate at the sessions of the seminar
- Read the required readings for each meeting in advance. Consult the recommended readings and/or additional literature on topics you want to focus on in your memos and term paper.
- Write short memos on three of the ten weekly topics. The memos should actively challenge the week's readings, raise questions, and may already contain some ideas of how to address the identified gaps. These memos are due on Monday evening of the week in which this topic is scheduled. Students need to be prepared to briefly present the main arguments appearing in their memos in class to kick off our discussion.
- Prepare and present a research design (due in week 14) that outlines the research question, relevant literature, and empirical strategy for the research paper
- Discuss a research design of another student
- Write a research paper on a topic chosen by the students (in agreement with the instructors)

The final grade will primarily depend on the term paper (70%). However, the written memos, research design, and class participation are also taken into consideration (30%).

Course materials will be available at: <https://icr.ethz.ch/teaching/>

If you have any questions or feedback on course contents, structure, and requirements, do not hesitate to contact one of the instructors.

Block I: Introduction & Concepts

Week 1 (20 February). Introduction & Logistics

Week 2 (27 February). Concepts & Classical Approaches

Sambanis, Nicholas. 2004. What Is Civil War? Conceptual and Empirical Complexities of an Operational Definition. *Journal of Conflict Resolution* 48 (6): 814–858.
